NOTE: The hardware used for your application will vary. Please use the appropriate hardware from the list above.

NOTE: The mount that is shown in these installation instructions is for instructional purposes only. The purchased mount may vary in appearance.

UFP-280 Installation

The UFP-280 LCD Mount Adapter can be used with any VESA 75 x 100 model.

1. Invert the monitor and place it on a soft and flat surface.
2. Secure the UFP-280 to the back of the monitor by using the appropriate mounting hardware (please see Parts List).
3. Secure the UFP-280 Adapter plate to the end of the mount that was purchased. Use the M4 x 6mm Phillips Head screws (4ea).
4. When complete, secure the display with the provided display hardware (supplied).

CAUTION: Do not over tighten the screws to the monitor. Failure to do so could result in damaging the threads and monitor.
